How to Embed FASHIONGO Widget on OpenCart

Introduction

This comprehensive guide is designed to assist vendors using OpenCart as their web builder in integrating the FASHIONGO widget into vendors websites. The FASHIONGO widget directs buyers to the vendor's FASHIONGO referral link, where they can sign up and make purchases. Follow these detailed steps to seamlessly integrate the widget, enhancing user experience and driving more sales.

Retrieve Your Widget Code (Applies on all Methods)

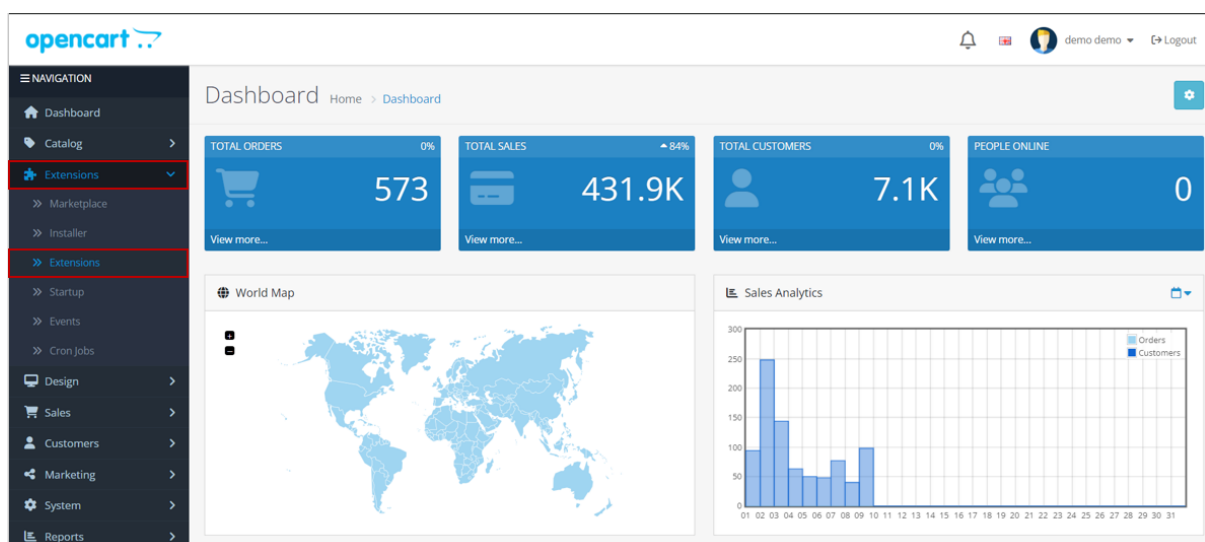

- Log in to the FASHIONGO Vendor Portal (Vendoradmin).
- Navigate to the "Referral Widget" section and locate the widget options.
- Choose between the standard or button version of the widget, depending on your design needs.
- Copy the widget embed code.

Method 1: Embed Widget on a Specific Page

This method allows you to embed the FASHIONGO widget on a single page of your OpenCart store.

Step 1: Check and Install the HTML Content Module

- Navigate to Extensions > Extensions in your OpenCart admin dashboard.

- Set the filter to Modules.

Extensions Home > Extensions

Extension List

Choose the extension type

Modules (11) Filter

Modules

After you have installed and configured a module you can add it to a layout [here!](#)

Module Name	Status	Action
Account	Enabled	
Banner		
Category Banner	Enabled	
Homepage Manufacturers	Enabled	

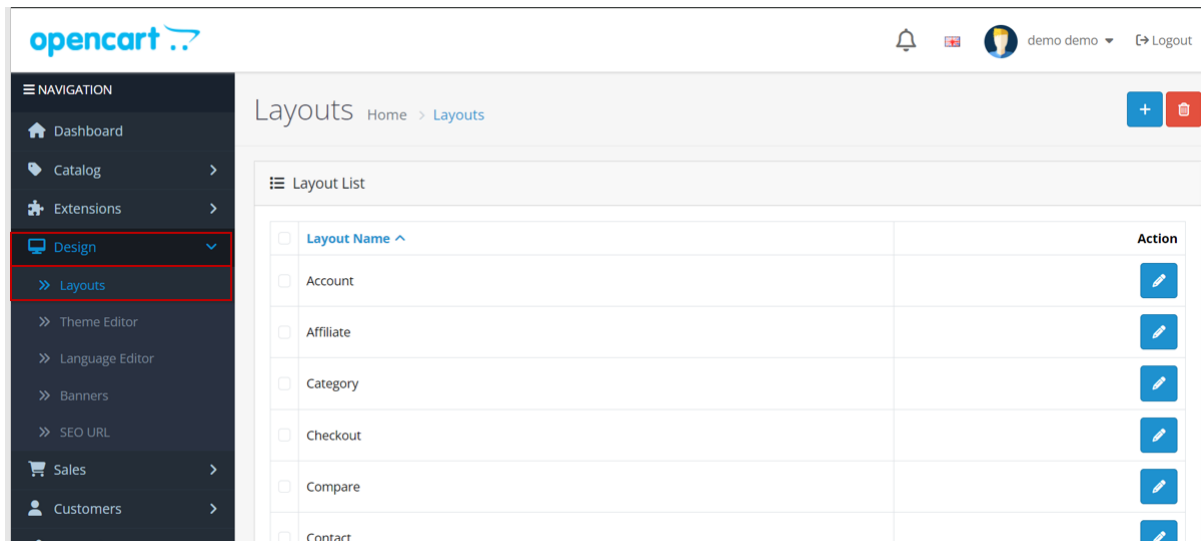

- Look for the HTML Content module, and if it's not installed, click the green + button to install it.

Homepage Manufacturers	Enabled	
Homepage Slideshow	Enabled	
Best Sellers	Disabled	
Category	Enabled	
Featured		
Featured	Enabled	
Filter	Disabled	
HTML Content	Disabled	
Information	Disabled	
Latest	Disabled	
Specials	Disabled	
Store	Disabled	

- Once installed, click the blue Edit button to enable the module.

Step 2: Access OpenCart Layout Settings

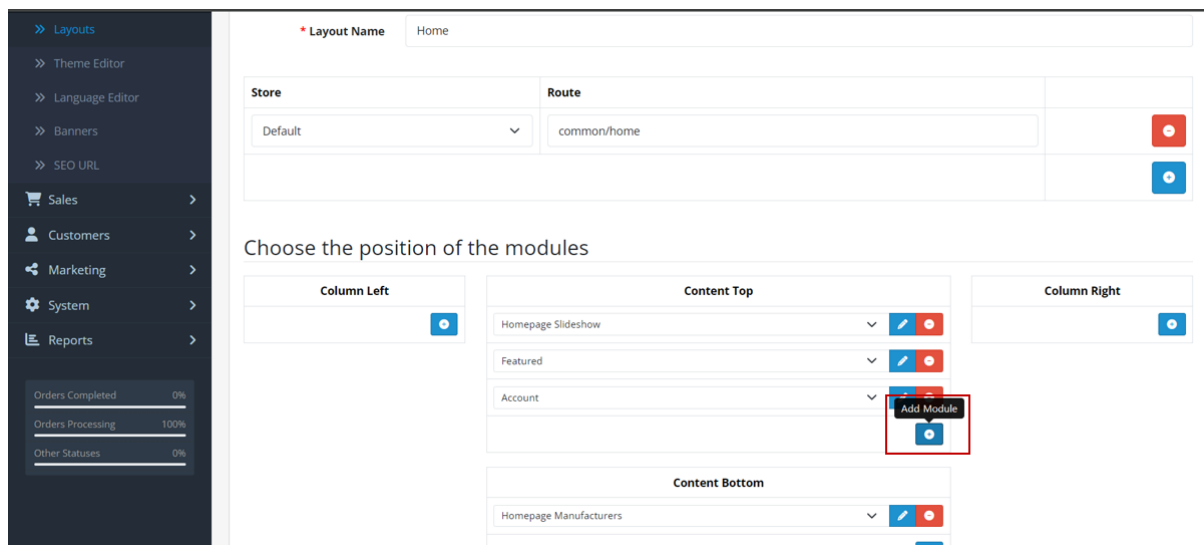

- Go to Design > Layouts.

- Select the layout where you want to place the widget (e.g., Home, Product pages).
- Click Edit next to your selected layout.

Step 3: Add the Widget Code to the Layout

- Click on the + sign to add a new module.

- Select the HTML Content module.
- Paste the widget code that you copied from the FASHIONGO Vendoradmin portal into the HTML content field.
- Save the changes to apply the widget to the chosen page.

Method 2: Embed Widget as a Pop-up

Step 1: Create a Pop-up using HTML Content Module

- Ensure that the HTML Content module is installed and enabled as described in Method 1.
- Go to Extensions > Extensions and select Modules.
- Click Edit on the HTML Content module.

Step 2: Add Pop-up HTML, CSS, and JavaScript Code

- Insert the following HTML in the module:

```
<div id="popup-widget" class="popup-overlay" style="display:none;">
  <div class="popup-content">
    <span class="popup-close" id="popup-close">&times;</span>
    <!-- Insert FashionGo widget code here -->
  </div>
</div>
```

- Add the necessary CSS to your theme's stylesheet file to style the pop-up:

```
.popup-overlay {
  position: fixed;
  top: 0;
  left: 0;
  width: 100%;
  height: 100%;
  background: rgba(0, 0, 0, 0.5);
  display: flex;
  justify-content: center;
  align-items: center;
  z-index: 1000;
}
.popup-content {
  background: white;
  padding: 20px;
  border-radius: 8px;
  width: 80%;
  max-width: 500px;
  position: relative;
}
.popup-close {
  position: absolute;
  top: 10px;
  right: 10px;
  font-size: 20px;
  cursor: pointer;
}
```

Step 3: JavaScript Code for Pop-up Behavior

- Add the following JavaScript code to trigger the pop-up after a set delay:

```
<script>

    setTimeout(function() {

        document.getElementById('popup-widget').style.display = 'flex';

    }, 5000);

    document.getElementById('popup-close').onclick = function() {

        document.getElementById('popup-widget').style.display = 'none';

    };

</script>
```

Step 4: Save Your Changes and Test

- Save the module settings.
- Visit your OpenCart store to confirm that the pop-up appears after the specified delay.

Additional Notes

- **Testing:** Test each integration method to ensure the widget displays properly in your OpenCart store.
- **Customization:** Feel free to adjust the CSS and JavaScript to customize the widget's appearance and behavior according to your needs.
